SUMMARY

Frontend Developer with a strong grasp of HTML, CSS, and JavaScript, along with experience in frameworks like React. Passionate about creating responsive and user-friendly web applications. Eager to contribute to a dynamic team and continuously learn new technologies.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript
- **Frontend:** React, HTML, CSS, Bootstrap
- **Database:** MySQL
- **Version Control System:** Git, GitHub

PROJECTS

Amazon Clone Website.

- Developed a responsive Fashion Website using HTML and CSS with media queries. The site features visually captivating pages showcasing Amazon clone, Showing a Cloathing ,Electronic items, Toys , Beauty Products & Health and Personal Care Products and detailed information about Cloathing. Focused on creating an intuitive and engaging user experience without using backend or database technologies.

Weather-App

- Build a simple weather app that allows users to check the current weather for a specific location. The app will use HTML for structure, CSS for styling, and JavaScript to fetch and display weather data from an external API.

To-Do-List App

- Build a simple To-Do List app using React. This app will allow users to add, edit, mark as completed, and delete tasks. The project will focus on using React components, state management, and event handling.
